

# SONICWALL®

• SECURE MOBILE ACCESS ADMINISTRATOR •

**The SonicWall Secure Mobile Access Administrator (SMAA)** curriculum provides students the required background and knowledge to begin designing, implementing and troubleshooting SonicWall Secure Mobile Access (SMA-1000) products.

## Course Objectives

The Secure Mobile Access Administrator (SMAA) course provides instruction on the administration and management of SonicWall's Secure Mobile Access (1000) Appliances to provide secure, anywhere access to applications and resources for employees, business partners and other users. This course covers the following topics:

- System Overview
- System Administration
- Access Methods
- User Management
- Workplace Portal
- Access Controls
- Authentication Servers
- End Point Control
- Central Management Server
- Global Traffic Optimizer

## Training Delivery Modality

The SonicWall Secure Mobile Access Administrator (SMAA) curriculum is delivered via an e-learning curriculum through SonicWall University. This flexible and learner-centric e-learning curriculum provides students with anytime, anywhere access to complete the course modules at their own pace.

Activation keys are required to access the course modules and can be obtained by your [Authorized Training Partner](#) when you purchase the SMAA certification modules.

## Intended Audience

This course is recommended for all administrators of SonicWall SMA Appliances who need to maintain and monitor an appliance. It is assumed that the student will have at least a basic understanding of the technologies being used in their environment or the environments of their customers. Recommended course knowledge prerequisites include:

- Basic understanding of networking and networking technologies
- Familiarity with SSL, certificates, and certificate authorities
- Basic understanding of user directories (LDAP, Microsoft Active Directory, or RADIUS)
- Basic Understanding of VPN technologies (SSL)

Successful completion of the **SMAA** curriculum qualifies you to take the **SonicWall Secure Mobile Access Administrator (SMAA) Certification Exam**. Delivered in the same format as the SMAA course, you will have access to it on-line via SonicWall University using the unique exam key provided to you upon completion of the e-learning class. For more information about certification paths, visit the Certification Programs page.

## Duration:

The self-paced eLearning training modality of the **SMAA** training program takes approximately 4-6 hours to complete.
